

Features

Menu bar

In every page, we have a menu bar on top, which can jump to the web page the user wants to go to by clicking the menu bar. Click the logo in the navigation bar to return to the home page as well. There is also a profile picture in the menu bar, when the user clicks the profile picture will jump to the user profile interface.

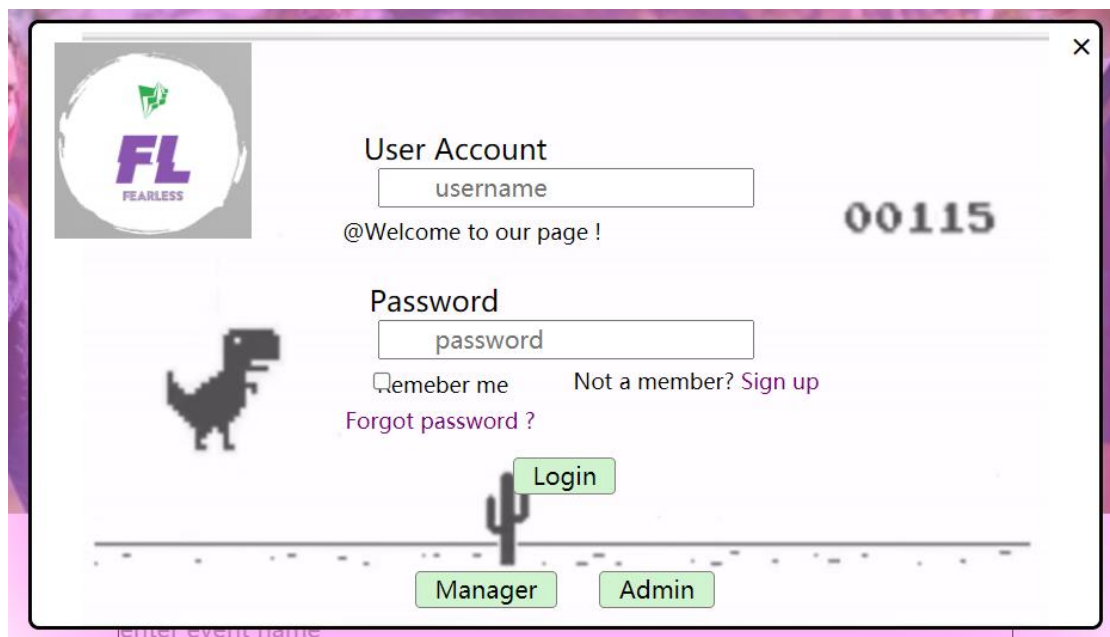

When the user moves the mouse over one of the options in the menu bar, that option will change color.

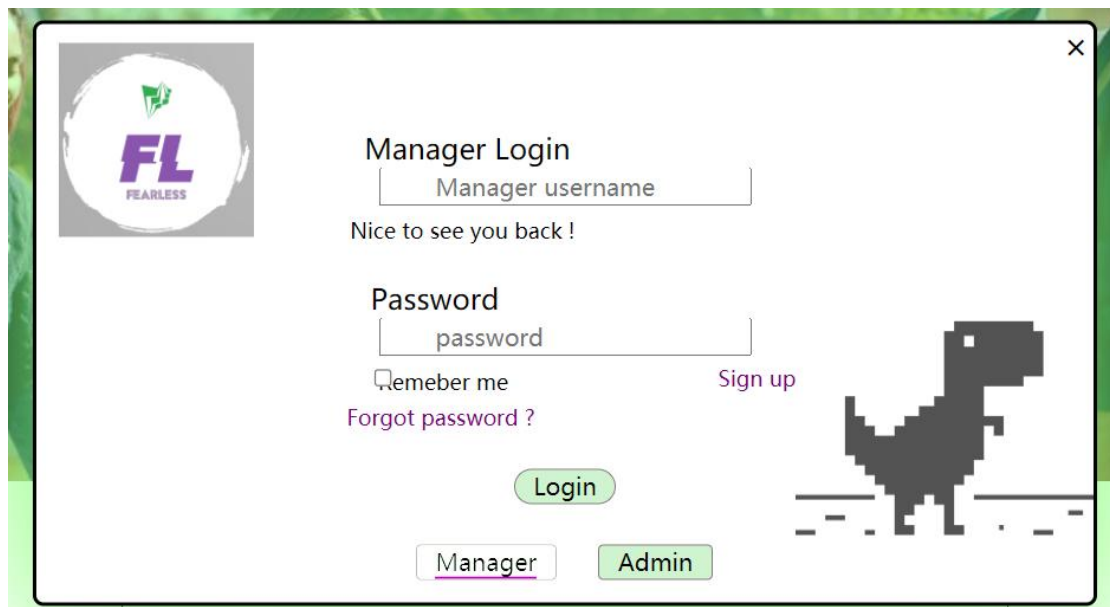

Login

In the menu bar there is a login that users click to register or log in to their account. Users can also click the button below to choose to log in or register the manager or admin account

When the user moves the mouse over manager or admin, an underscore appears, when the user clicks, it changes to the manager or admin login screen and changes the background light, and the dinosaur also changes position and action

Three different kinds of logins:

User login

Users can register or log in from the menu bar, then select and join clubs on the clubs page, manage their user information on the user profile page, and view club updates and upcoming club events and replies.

Manager login

Club managers can register or log in to an account that belongs to the manager. From the manager's account page, the manager can manage their information and view the membership list of the clubs he manages. The manager can also publicly and privately publish updates to club members, create and update club activities, and see which club members offer RSVP.

Admin login

The system administrator can log in to the system administrator page, the administrator can manage their user information, can manage users, can also manage clubs, and the system administrator can also create administrator accounts for other people

User profile page

In the user profile page, when the user moves the mouse over the club to which the user is registered, the club name changes color, and when the user clicks, the club details are redirected to the page. When the user moves the mouse over the specific event name under Events, the name changes color.

Update Information

When the user clicks update information in the user menu, A window will appear where users can change their user profile page by entering their first name, last name, email address, phone number. To prevent others from changing the user's information, you need to enter a password to update it.

A screenshot of a web application showing a modal window titled "Demo Name" for updating user information. The modal contains several input fields: "First Name" with the value "Demo", "Last Name" with the value "Name", "Email Address" with the value "DemoName@example.com", and "Phone Number" with the value "1234567890". Below these fields is a section labeled "Confirm your password to update:" with a "Password:" input field. An "Update" button is located at the bottom left of the modal. The background of the application shows a sidebar with a "Demo Name" profile picture and a main area with a "EVENTS" section and a "Get Your Fitness on Track" heading.

Update Profile Picture

When you click update profile picture, a window will appear where you can upload your new profile picture

A screenshot of a web application showing a modal window titled "Demo Name" for updating the profile picture. The modal contains a label "Choose a new profile picture:" and a "Choose file" button. Below the button is the text "No file chosen" and an "Upload" button. An "X" button is located at the top right of the modal. The background of the application shows a sidebar with a "Demo Name" profile picture and a main area with a "EVENTS" section and a "Get Your Fitness on Track" heading.

Reset Password

Users can update their passwords by clicking reset password, but they need to enter the email address they use to log in and follow the steps on the letter sent to their email. This is to prevent others from changing the user's password without the user's knowledge.

A screenshot of a web application showing a modal window titled "Demo Name" for resetting the password. The modal contains a text block: "Please enter your email address. We will send an email with instructions. Please follow the instructions to reset your password." Below this text is an "Email address:" input field. A "Reset Password" button is located at the bottom left of the modal. The background of the application shows a sidebar with a "Demo Name" profile picture and a main area with a "Fitness Club" heading.

Log out

Users can also log out of their account by clicking Log Out

Log out

Home page

Images scroll and can be clicked and jumped to events page

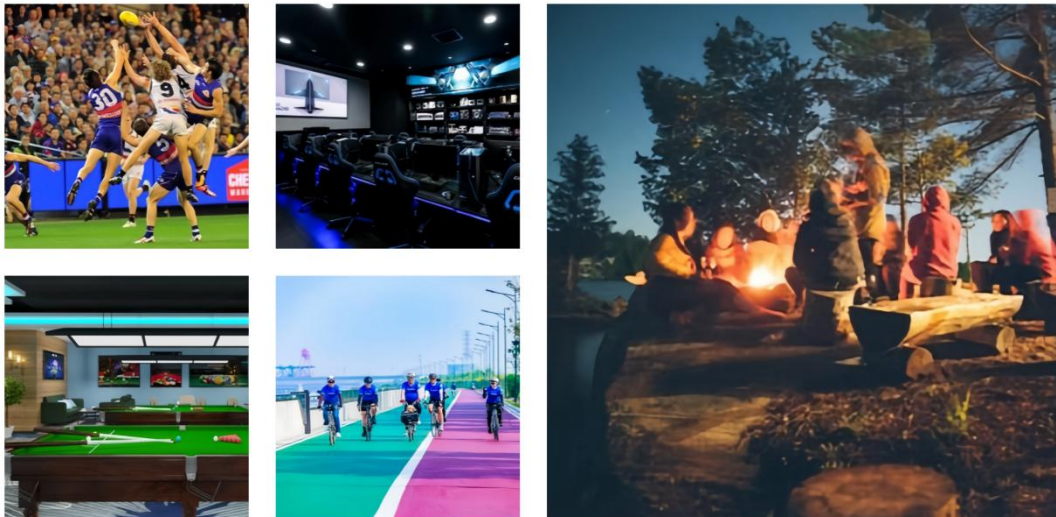

On the home page, we have a scrolling image feature that allows users to see some club photos, and users can jump to the events page by clicking on these pictures to

view some club event.

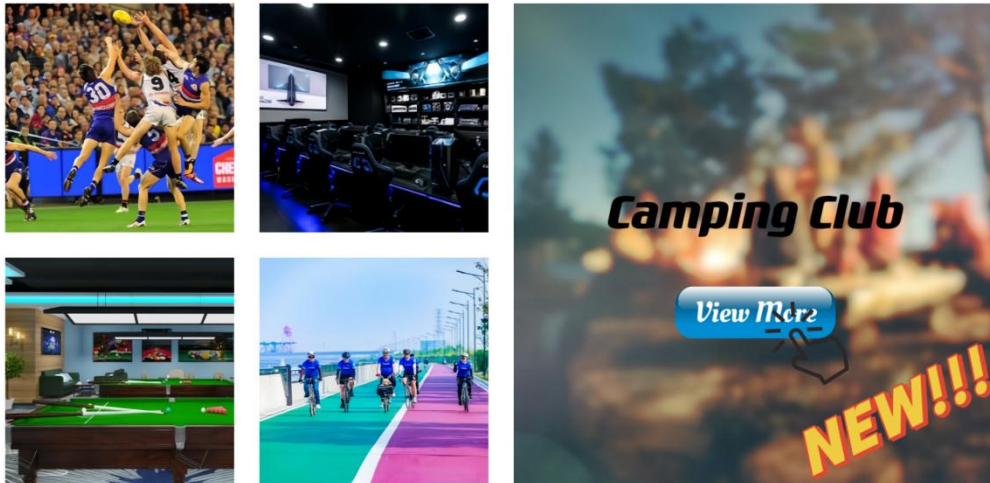

The picture becomes blurry when you hover over it

We also put some pictures in the home page

Click to jump to the clubs page

When the user mouse over one of the images, the following effect appears,click to jump to the clubs page.

Click the button to jump to the about page

There is also a button at the bottom of the home page to jump to the about us page

About Us

With more than 130 clubs at the University of Adelaide, there is a crowd for everyone. You don't need to be on campus to experience club life. Clubs are open to everyone, so you can join and engage with our communities virtually from the comfort of your own lounge room.

Whether you're a gamer, an actor, a debater or a dancer; a singer, a writer or simply love yoga. Want to challenge a chess champion or quaff a cab sav; looking to learn a new language or taste a new tea. No matter where you come from or what you're into, the University of Adelaide has a club for you.

Event page

Search bar

In the event page, we made a search bar

When the user clicks on the search bar, the names of all the events appear

1. Get Your Fitness on Track
2. Weekend Group Cycling
3. READ Agatha Christie
4. Anime Viewing: GINTAMA

Users can search for events by entering the keyword they want to find, users can also click the search content to enter the event details page

1. Get Your Fitness on Track

Hover over the image to enlarge and click to jump to the events details page

We also placed pictures in the event that were enlarged when the user moved the mouse over them. When users click these pictures, they will jump to the more detailed event page. (For the time being, we only make the event page of fitness club)

Get Your Fitness on Track

Weekend Group Cycling

READ Agatha Christie

Anime Viewing: GINTAMA

We have placed a link in the event interface of fitness club, and users can jump to the fitness page by clicking this link

Click on the club name and jump to the club details page

Fitness Assessment with a Personal Trainer: Get Your Fitness on Track

Our expert trainers will provide you with a personalized fitness assessment, including body composition, cardiovascular fitness, strength, and flexibility.

Clubs page

Search bar

Zoom in when the mouse hovers

In the Club page, we have also created a search bar that allows users to search for clubs by entering the name of the club, which allows users to jump to the club details page when they click on the club name under the search bar, and we have also created an image that will zoom in when the user puts the mouse over it

1. Game club

2. Boxing club

3. Reading club

4. Cycling club

5. Rugby club

Fitness club

Billiards club

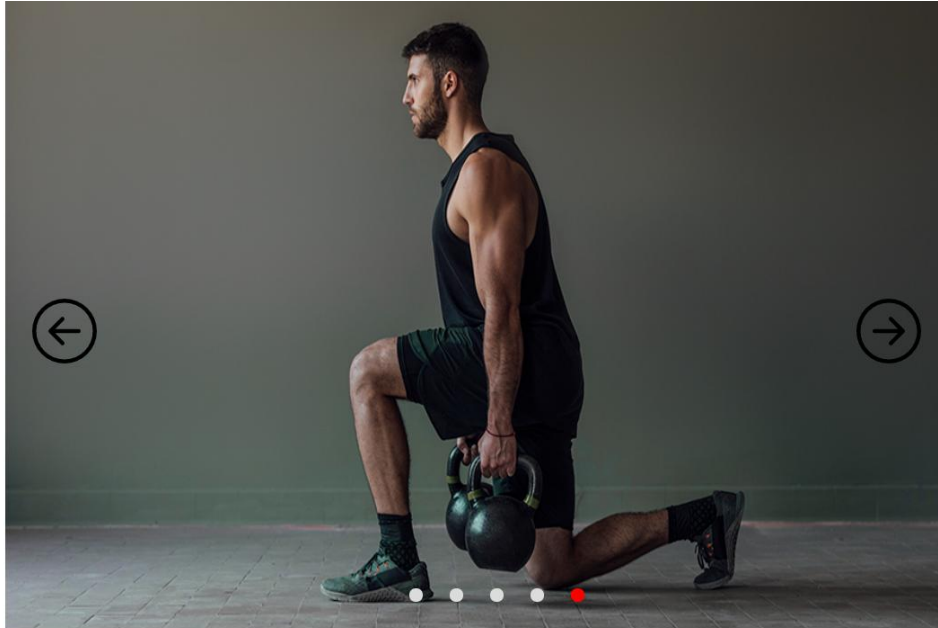

Game club

Basketball club

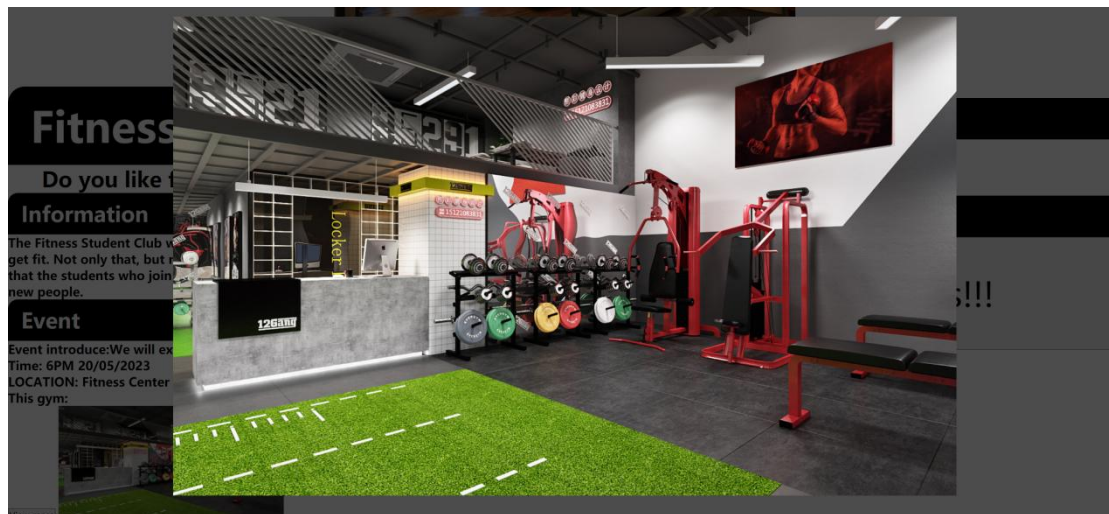

Click the left and right arrows to transform the image

After users click the club image they want to view, they will jump to the detailed information page of the club. In the detailed information page of fitness Club, we made an automatic scrolling image, and users can use the two buttons left and right of the image to scroll the picture(Temporarily, we only made the page of fitness club for display)

Click the image to enlarge, and then click any division to return to return

We also created a click to enlarge the image, and click anywhere again to close the image

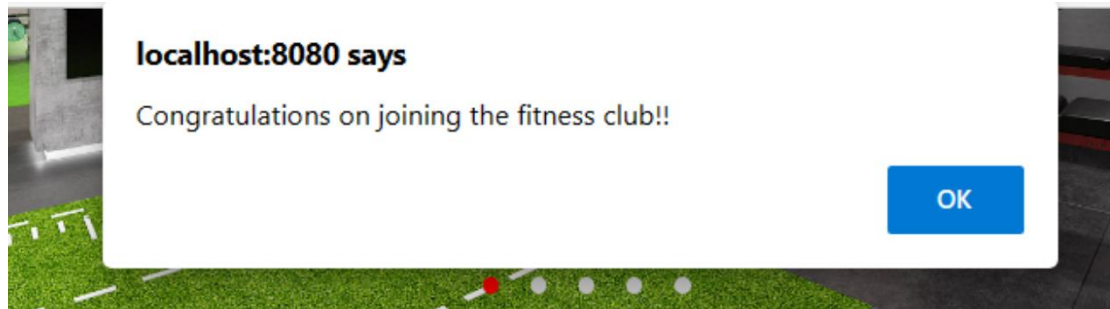

Click and a popover appears

We created a button to join the club. When the user clicks the button, he will join the club, and a pop-up will pop up indicating that the user has joined the club.

Join Us!!!

Click to join us!!!

Click to jump to the event details page

We put a button to the left of the picture of the event. If the user wants to know more about the event, they can click this button and then go to the details page of the event

Challenges Faced

In the process of making web pages, we applied a lot of knowledge learned in class, such as the production of buttons, the production of webpage jump, and so on. We also consulted a lot of extracurricular knowledge, such as the production of picture scroll, the production of cool login, the production of mouse hover picture enlargement, and so on. For us, it was not only about completing an assignment, but also about learning a lot of new knowledge about the web. Although this knowledge is a big challenge for us, we overcome it through hard work.

Most of the features mentioned above are ones we've already implemented, and some of them are ones we'll try to implement in the future. Not all of them may be perfect, but we'll improve them in the future to make the site more complete.
